Mrs Thatcher's abrupt treatment of Mr Pym at the launching of the Convervative manifesto on Wednesday was seized on by the Alliance and the Labour Party as another public sign that the Foreign Secretary, who has often been reported to have strained working relations with the Prime Minister, is on the way out if the Conservatives win.

Mrs Thatcher was angry about comments made by Mr Pym in a television programme on Thursday night, when he deprecated landslide victories. He had recalled the 1945 Labour trimmph which led to a period of majority government which he did not think was specessful and indicated that, rather than a landslide, he would prefer to see a Conserva- Mr. Pym after he gave a reply.

Vatican stays out of Heim dispute

By John Earle and Nicholas Timmins

The Vatican yesterday dis-sociated itself from the controversial attack on Mgr Bruce Kent, the general secretary of the Campaign for Nuclear Disarmament, by Archbishop Bruno Heim, its diplomatic representative in Britain.

But Mgr Heim responded by saying that he stood by his view that unilateralists were either "blinkered idealists", "useful idiots", or consciously sharing the Soviet ideology, and maintained that he was only reflecting the Pope's view on

After a week of discreet silence on the controversy. Father Romeo Pancrioli, the chief Vatican spokesman, said yesterday that Archbishop Heim's action had been an entirely personal initiative.

He was not authorized to say more, he said. But it appears clear from the length of time it had taken the Vatican to comment that considerable embarassment is felt over the ssue, and it is considered particularly unfortunate that such a controversial stand should have been taken by the first envoy since relations between Britain and the Holy See were raised to the equivalent of ambassadorial level 15

months ago.

The Vatican statement was immediately welcomed by the office of Cardinal Hume, the Archbishop of Westminster. A spokesman said: "This vindicates what we have been saying. Mgr Heim's statement was made in his own capacity and not in a formal capacity.

The support from working Thatcher into Downing Street has wanted marginally, though the Tories are still 10 points ahead of Labour among all women, according to the lastest MORI poll containing the

breakdown.
But the exercise of catching the female vote has been immeasurably muddled by the fact that women do not respond to the tried and tested electoral attitudes which affect men.

MORI's Mr Brian Goss-chalk's says: "Women are more interested in parochial issues, such as schools, pensions and social services. While men may feel they know something about defence policy, women tend to a gut reaction against what they view as militarist actions. This was most noticeable during the Falklands campaign, when a significantly lower number of women supported the task force, and the focal point of the Greenham Common protest late last year when the polls showed a distinct movement among women from Tory support to Labour. Alliance takes over Thatcher's shopping list

Looking like a husband and wife, slightly dishevelled, who had just rushed through a supermarket, Mr David Steel, the Liberal leader, and Mrs Shirley Williams, president of the Social Democratic Party, arrived at the Liberal/SDP Alliance press conference in London yesterday with a plastic bag full of groceries, Our Political Staff writes.

They said they had chosen the same items as those included by Mrs Margaret Thatcher in May, 1979, in her "shopping basket" that showed run their course, and, according to the pollsters, few distinct issues now divide men and mrs Williams wanted to shame

Mrs Thatcher into admitting that her Government's policies had been just as disastrous for the housewife.

One by one, Mr Steel took out the items: corn flakes, in Mrs Thatcher's basket 37p, now 53p; a loaf of bread, up from 291/20 to 47p; flour, up from 27p to 391,p; sugar, up from 29p to 46p . . . And so he continued.

The total price, on the same basket of goods, was now £7.8p compared with £4.87p in 1979. "The fact is that the price of the total basket has risen by 45p in the pound since the last election", Mr Steel said.

THE ISSUES OWNERSHIP

Battle on right to buy' front

Home ownership will be an important election issue. The main parties agree that extend. ing home ownership is a good thing but the way in which they approach the subject differs

greatly.

The Conservative Party again enters this election with a promise to council tenants that they will extend the "right to buy" first introduced under the 1980 Housing Act, which has pushed an additional 500,000 people into owner-occupation And since the Conservatives came to power four years ago it is estimated that a total of a million new owner-occupied households have been created.

Since the last election a whole new approach has been adopted occupation into home owner-strip. Schemes included shared ownership aimed at first-time buyers with little money who buy their homes on a part-rent-part-mortgage basis.

Mrs. Thatcher promises, if

reelected, to step up the rightto-buy campaign by offering greater discounts to council renants up to a maximum of 60 per cent of the market value of

the property.

In its manifesto the Labour Party says it would call a halt to further council house sales and empower local authority landlords to buy back on the first resale those homes already sold. But the party aims to extend home ownership by giving help to first-time buyers by making nortgages more easily available to the lower income groups.

While mortgage tax rehel will continue for existing home owners, Labour plans to phase on mortgages.
The SDP/Liberal Alliance

would retain the right-to-buy scheme but is keen to see potential home owners buy from the private sector. To assist purchasers the Alliance wants to extend the Capital Home Loan Scheme so that anyone saving £1,000 over two years would receive an extra £1,000 towards the cost of buying a home. Council tenants' rents paid over five years will count as equivalent to a £1,000 saving and will qualify for the extra £1,000.

Also, the Alliance would abolish higher rate tax relief on mortgages and aim to reform the system so relief relates to individual incomes rather than the size of the loan.

Each party talks of building more council homes although during the last four years public sector starts have slumped to their lowest level since the war. The Conservative emphasis is on building for sale and encouraging the private rented sector, while Labour calls for a freeze on council rents and speedier building of homes for the public sector.

Since 1979 1,000,000 more people have moved into home ownership which now accounts for about 58 per cent of all households in Britzin, More than 500,000 council tenants have bought their homes under the Conservative right-to-buy scheme which was introduced under the 1980 Housing Act. House-building starts fell sharply from the mid-1970s when work began on more than 300,000 new homes to 150,000 in 1980 and just over 250,000 last year.

Deadline for unionist deal

By Richard Ford Hopes of an electoral pac between Northern Ireland's rival unionist parties in six marginal seats hung in the Official Unionists in two constituencies refusing to stand aside for the Democrati Unionist Party.

The Rev Ian Paisley's Democratic Unionists have set a noon dealine today for any deal with their rivals, but such is the element of bluff and counter-bluff in the negotiation that it may continue until nominations close on Monday.

Unless agreement is reached the unionist vote in six scats where the nationalists have a majority will be split with the prospect of either the Social Democratic and Labour Party or the Provisional Sinn Fein taking victory. The Democratic Unionist want a clear run in Foyle, West Belfast and Mid-Ulster but it is understood the Official Unionist candidate in West Belfast does not wish to withdraw. Mr William Thompson, the party's association chairman in Mid-Ulster, said

Mrs Thatcher began her campaign proper yesterday personally. It is not simply that she dominates British also that she personifies the appeal that the Conservatives evidently have for the voters at

that the Government has had mination that the Government impressive than its overall record of achievement.

If the Conservatives win this election, as all the polls-suggest that they will, it will be because they convey a much stronger impression than the other parties of knowing precisely what they mean to do. It is a style especially associated with Mrs Thatcher.

impressed with her strength three weeks of campaigning, or might they by then find her very assurance grating on their nerves? It must be one of the principal objectives of the Conservative campaign guard against that risk.

From that point of view, vesterday's press conference was a success. Mrs Thatcher suce without becoming either shrill or hectoring. Occasionevident, but not more the be regarded as permissible to a politician under the pressure of critical questioning. She dealt magisterially with Mr Healey's accusation of lying succumbing to what must have been the temptation to become involved in a slanging match

one or two occasions to refer questions to Sir Geoffrey Howe and Mr Patrick Jenkin. who were with her on the platform. The desired impression of a Cabinet of colleagues might have been conveyed still more effectively if, after asking Sir Geoffrey for his comments on one question, she had not then chatted to Mr Jenkin during Sir Geoffrey's answer. Neither they, nor the party chairman, Mr Cecil Parkinson, who was also on the platform, thought of chatting while she was speak-

One cannot yet be convinced that the Conservatives will avoid the trap of seeming to rely too beavily on her as the campaign progresses. Central Office appears strangely reluc-tant to publicize the activities of other Cabinet ministers. It is not possible to get their speaking engagements for more than three days ahead, a practice which, if it is conpactice throughout the cam-paign, will inevitably result in media attention being focused even more than it otherwise would be on Mrs Thatcher.

A party that is consistently well ahead in the polls always needs to guard against the danger of appearing to bask in its own popularity. It has to remain sensitive, even as it feels itself to be cruising to victory, to the preoccupations of particular sections of the electorate. The Conservative private polls, for example, have not been showing the usual evidence of the party having more appeal for women than men.

That seems to be partly because women are naturally particularly worried about unemployment because they see the effects on family and friends. More of them are liable to fear the risks of nuclear war. But another surprising reason has emerged why the Conservatives have not been doing quite so well as they might have expected among women voters: they are not being given the full credit for the Government's achievement on inflation. A number of women have apparently felt that the claims of declining inflation must be bogus because they do not find prices going down in the shops.

That ought not to be problem beyond the powers of Conservative publicists. But it is a reminder of the bizarre pitfalls that may lie in wait for even the most assured political campaign. At the moment the Conservative position is strong, Mrs Thatcher's authority is evident, her manner remains unrufiled. But there are still nearly three weeks to go before June 9.

The compromise which the Senate eventually approved late on Thursday night after throwing out four earlier budget plans would raise taxes by \$9,000m (£6,000m) in 1984 and by a total of \$73,000m over the next

The Senate's \$848,700m budget would also hold the increase in defence spending at 6 per cent, compared with the 10 per cent increase that the Administration is seeking. The Senate's budget plan envisages a deficit of \$179,000m, whereas the Administration's budget proposal would leave a deficit of more than \$192,000m.

The house of Representatives has already approved a budget plan which contains even larger tax increases and a lower level of defence spending. The House version calls for more than \$30,000m in increased taxes during 1984 and only a 4 per cent rise in defence spending.

The Senate and House versions now go to conference committee, which will probably

Three more parties join Turkey's election rush

Turkey's progress towards democracy gained momentum yesterday with the foundation of three more parties, two on the right and one with social democrat tendencies. The foundation of the Grand Turkey party (BTP) headed by

General elections are scheduled for November and there

will be the Social Democrat block to contend with. Last Monday, ex-General Turgut Sunaip had led the way with the foundation of the Nationalist Democracy Party, which the military rulers once

hoped would emerge as a strong centrist force, and which reflects the philosophy of the army takeover in September 1980. However, the BTP is expected to be the leading force in the conservative camp, with backing from the rank and file of Mr Demirel's former justice party, which was closed along with other political parties after

This beautiful plate, designed by an award-winning artist and created by the world-famous porcelain house of Wedgwood, may well be the most significant collector's plate issued this year.

The design is an original by Rosanne Sanders, winner of both gold and silver gilt medals for floral art from the Royal Horticultural Society. She has portrayed with meticulous artistry some of the loveliest flowers shown at Chelsea. A single burnt-orange begonia. Delicate Iceland poppies and miniature roses. Alpine primroses ranging from yellow to orange to copper. Graceful spikes of delphinium in lavender and violet. An enchanting, true-to-nature bouquet, surmounted by a cameo study of The Royal Hospital, Chelsea - home of the Flower Show for the past 61 years.

This new 1983 plate will be crafted in fine bone china by Josiah Wedgwood and Sons - the first ever 'Chelsea' issue of that renowned porcelain house and a significant collecting first. Through their

traditional skills in the firing of infinitely varied colour tones, the true splendour of the artist's original work will be carefully preserved in fine bone china. And the rich appearance of the plate will be further enhanced and defined by double borders of 22 carat gold.

Each plate will be accompanied by a Certificate of Authenticity, signed by the Secretary of The Royal Horticultural Society, attesting to its unique qualities and distinctive status as an official issue of The Society.

The issue price of 'Chelsea Pride' is £45, and is guaranteed excepting only any change in the rate of VAT. The plate will be available only during 1983, and only by application at the Chelsea Flower Show or direct to Franklin Mint Limited, officially appointed by The Royal Horticultural Society to fulfil applications. There is a further limit of one plate per collector.

(Judement delivered May 19)

In determining whether the behaviour of members of a group of youths, in the presence of police officers but no other members of the public, was likely to cause a breach of the peace, contrary to section 5 of the Public Order Act 1936, as amended, the possibility had to be considered of one of them, by his behaviour, bringing about encouragement or incitement breach of the peace by others.

The Queen's Bench Divisiona Court considered the limits of Marsh v Arscott (The Times, March 3, 1982; (1982) 75 Cr App R 211). dismissing an appeal by case stated by the prosecutor, David Read against the acquittal by Yeovil Justices on May 13, 1982, of three youths, David Robert Jones, David Coleman and David George Smith, alia, with an offence under section 5

Peter Dickinson left Punch to write crime fiction and children's books. He won a Golden Dagger almost immediately and has just published Hindsight, his twelfth thriller. Interview by Caroline Moorehead

Making crime pay

Peter Dickinson was 40, assistant editor at Punch, a poet by desire, a reviewer of crime fiction and parodist by trade, when he sat down one evening at his kitchen table after dinner and wrote the first chapter of a detective story. When, two thirds of the way through, he got stuck, he turned his hand to a children's book, born out of an unfinished nightmare of the previous night that he wanted to complete and put right. The first, Skin Deep, was awarded the Crime Writers' Association golden dagger, the second, The Weathermonger, wide acclaim. That was in 1969. Dickinson is now on his thirtieth book. Or are the Saatchis keeping one each? Meanwhile the Advertising Standards Authority has been fielding com-plaints about the national newspaper adverts inviting us to sign away our rights of we vote Labour, which concluded: "I understand that if I sign this now I will not be able to change my mind for at least five years." It should, of course, have read: "I fully realize that I am guaranteed the right to change my mind within five years." The ASA says: "The advertisement is plainly wrong, but there is nothing we can do. Political advertising does not have to be decent, honest, or true." I expect you had already noticed that.

 A case of claret then - no false economy in this column - for the reader who documents the earliest occasion on which a Tory statesman (or woman) claimed to see as in another Saatchi poster, light at the end of the tunnel. Hint: it was rather a long time ago.

Denis Healey is a profiteer at heart. I tell that not from his writing, though I have had that under the microscope too, but from his conduct at yesterday's Labour press conference. He offered to produce copies of the now famous Central Policy Review Staff report on Unemployment and Young People in return for a contribution of £200 each to party funds. Until now, the first and last time Lady Olga Maitlend slept in a sleeping bag was ten years ago in a Turkish olive grove. When she repeats the experience this weekend, the scenery will be rather different, for the leader of Women and Families for Defence plans to camp in a caravan with three chums in the heart of Christian CND's Peace Pentecost rally at the proposed F111 site at Upper Heyford. Like cruise launchers, she would have difficulty getting through a cordon of peace pickets so she aims to move while her opponents are marching from caravan life more than she does the weekend neighbours.

The night Stokowski left the Peanut shattered

The Saturday before Heartbreak Thursday was a perfectly ordinary concert-season Saturday. I mean we saw the orchestra men that day, we saw Marshall - and not one of them said anything. They didn't know, any more that we did, that our world was going to end on Thursday. If they had, they would have warned

It rained that Saturday. It April but very cold, so when I left the house after lunch I was wearing my old Girl Scout moccasins and my humberjacket, and along with the brown paper bag with my dinner sandwiches in it I was carrying my family's automobile robe. We were going to be sitting on line for Peanut Gallery tickets from two in the afternoon till quarter to eight that night and it wasn't going to get warmer as the hours went by.

I took the subway down to Broad and Walnut and walked the block to Broad and Locust where the Academy of Music was. The front entrance was on Broad Street, but running from the corner for half a block along Locust Street clear to the stage door and the Peanut Gallery entrance, there was this long step under a second-storey ledge. If you got on line early, you could sit on the step and wrap yourself in your old camp blanket or your family's automobile robe, and you were out of the wet because of the ledge. Whereas if you got on line late - say around four o'clock - the line would be clear down to the corner. And around the corner you had to stand bolt upright and freeze to death on. Broad Street, which was the coldest, widest street in the entire city of Philadelphia.

Looking up Locust Street from the corner, I could see Fay and Natalie, by themselves, way up at the head of the step next to the stage door. Nobody else was there yet. Fay and Nat were best friends and they were always first on line and I loved sitting next to them because they knew Stoki better than the rest of us did. I walked toward them, past the big wall posters above the step with "The Philadelphia Orchestra, Leo-pold Stokowski, Conductor", and

the week's programme with a streamer reading "Final Concerts of the Season" plastered across the bottom. I reached Fay and Nat and said hello and Fay said: "His box is full tenicht." full tonight."

The biggest speculative advantage to being first on line was, you might get to sit in Stoki's box.

His cab drove up to the stage door at 7.30, 15 minutes before the Peanut Gallery doors opened. He would get out of it and stride toward the stage door and the line would scream Hello - (nobody on line was over 21) - and Stoki would wave back. But about every fourth Saturday, he would glance at the first people on line and hold up, say, three fingers. That meant there were three empty seats in his box for the concert. So the first three people would get out of line and go around to the front entrance and inform the usher with great dignity that they had been invited to sit in Mr Stokowski's box. Then they would carry their paper bags and coats and blankets up the grand staircase to the parquet circle and deposit themselves in the front seat of Stoki's centre box.

At 8.30 his other guests would arrive, all got up in evening clothes. One night it was Helen Hayes and her family. One night it was an ambassador home on a visit. Whoever it was just climbed over our coats, blankets and handbags piled on the floor and took the back seats we left for them. We never moved for anybody.

By six, it began to rain really hard, and the second big advantage to-being first on line paid off. Marshall came out. Marshall Betz was the orchestra librarian, but along with looking after the scores, he was a sort of backstage factorum. He was red-faced and becefy and half-bald, and he glared ferociously before waving the group of us inside the stage door with a stubby, brawny

"Now you go sit in the greenroom till the house opens", he bawled at us. "And behave yourselves!"

We went into the greenroom and left our handbags and dinner bags there, and Fay, who always knew where everything was, borrowed a backstage flashlight. Carrying our blankets and coats, we followed her flashlight up the five pitch-black flights of stairs to the pitch-black Peanut Gallery, and then we more or less felt our way down to the front row and spread our blankets and coats across the entire front row of

seats, to save them for friends who had had to go to the dentist or shopping with their mothers, and would get on line late and wind up way up at the back under the roof

When we go back to the green room we made ourselves comfortable and had dinner. We were still sitting there at eight, when the orchestra men began drifting in. Some of the first-deak men - like Charlie Gusikoff, the first trombone, and Willie Kincaid, the flamist really liked us and they said Hellohow-are-you. The rest of the men just looked at us and swore, in a discouraged fashion. About ten past eight, some second-violinist turned to us and said snappishly: "Do you mind if I put on my other pants?" and we left for the Peanut. For 20 minutes we stood scanning the back of the house and shouting to friends to come on down, we had seats saved. Then Stoki walked out to the podium and the house-lights went able to afford youth concert tickets, on earth but him and the music.

After the concert, we went across to the drug-store for milkshakes, to give Stoki time to shower and hange and go home. Then we went around to his house to serenade him. He lived at 1716 Rittenhouse Street, in a three-storey brownstone next to a corner parking lot. There was an art shop on the ground floor. he had the two upper floors. We would stand in the parking lot, around at the side under his livingroom windows, and sing. After a minute, a living-room window would go up and Stoki would lean

"How many of you are there?" he would call down. If there were six or less, he invited us up. If there were more than six, he would come down and sit on the front step and talk to us. That Saturday night there were 10 or 12 of us huddled in the parking lot when he opened the window. "How many of you are there?" he asked. "Six", said Fay.
So of course Stoki said: "Go

round to the front and I'll press the buzzer". We went around to the front door, and we clambered up the narrow, rickety steps while Stoki stood on the landing - his thick white hair straight up like a beacon above the navy shirt and slacks he had changed into - and counted us with his fingers and his lips. When we got to the top, he said: "Which is

the sixth?" and we giggled. "Mind the wires", he said (He always had tangles of wires on the landing, he was always experimenting with sound equipment). He led us into the living room and threw cushions on the floor in a circle for us to sit on. Then he sat, in a floppy velvet armchair facing us, and asked how we'd liked the Shostakovich, and we started to talk. He didn't talk, he listened. Lounging in the chair with his long legs stretched out, he questioned every one of us about our reactions to the Shostakovich, his electric blue eyes fastened on each speaker in turn.

Youth concerts were held every fourth or fifth week; there were six of them during the concert season. You had to be aged between 13 and 25 to buy a ticket, and the Acedemy held 3,000 people - and even so. there were always a couple of hundred kids turned away. None of us could afford regular concert prices - \$3 downstairs, \$2.50 in the parquet circle and so on - except for the 50 cent seats in the Peanut. Well, down, and there was nothing alive so he conducted for nothing and the orchestra played for nothing, and we acted as ushers and wrote the programme ourselves and sold ads in it to pay for the printing. So youth concert tickets cost 75 cents downstairs, 50 cents in the parquet circle, 35 cents in the balcony, 25 cents in the family circle and 10 cents in the Peanut, and a lot of high-school teachers would slip dimes to poor kids so everybody

could go. No seats were reserved on any

There would be a breathless pause as we waited. Then Flagstadt or Heifetz would walk out on stage. and after a spiit second of stunned gratification pandemonium would break loose, as 3,000 young people lost their lungs entirely. But - as Heifetz and Flagstadt told the press afterward every year - once the music started, we were the most rapt and utterly silent audience either of hem ever performed before.

The ovations afterwards used to make all the chandeliers shake Every soloist played encore after encore because the audience refused to go home. Finally, around midnight, Stoki would get rid of us by having the orchestra play a Sousa march, during which he walked off the stage and had the houselights turned off, floor by floor.

Between youth concerts, he kept us busy. He helped us found a youth orchestra, a youth chorus, a youth dance group and a travelling youth record library.

It rained again on Thursday. I got home late from business school because the trolley-car was caught in traffic, and I rushed upstairs to dress for the youth concert with a bare hello to my mother. When I came downstairs for dinner, the whole family was in the living room and they stopped talking when they saw me. Then my father, with a very strange look on his face, handed me the Evening Bulletin.

Stoki's picture was on the front page, next to another man's picture. Under Stoki's picture, the caption read "Outgoing Conductor"; under the other man's, it said "Incoming Conductor". The story underneath said that Stoki had resigned. He was going to California and he wasn't coming back. Ever. Just like that, it was all over.

I don't remember dinner and i don't remember the subway ride. But when I came up out of the subway at Broad and Walnut, I didn't hear anything and my heart stopped: I knew my watch must be wrong and the concert must have started. When 3,000 people between the ages of 13 and 25 are congregated on one corner, you can hear them a block away without any trouble. I started to run and I ran all the way to Locust Street. Then I saw

The concert hadn't started. The doors hadn't even opened yet. They were all there, 3,000 young people jammed on the steps and the sidewalk in front of the Academy of Music and lined up along Locus Street to the Peanut entrance. They were standing there in the misty rain and they were absolutely silent. Here and there a girl was crying. I even saw a boy crying. But nobody was saying anything. What was there to

It's strange, but I don't remember that last youth concert at all. I only remember that a crowd of us maybe's hundred of us - waited for him at the stage door after the concert. We wanted an explanation. We waited an hour in the rain before he finally came out. We asked him why he was leaving us, why he was going to Hollywood, of all places.

"We want to take music out of the concert hall", he said, "and give it to everybody. We have started to do this by making phonograph records and giving concerts on the radio. But there are countries where people don't have electricity in their homes. They have no record-players and no radio. What is astonishing is that everywhere in the world - everywhere! - there are movie theatres. The orchestra and I are going to Hollywood to make movies - and pygmies in Africa and coolies in China will come to our movies, and hear Bach for the first time".

How could we say we didn't want him to give to people in Africa and China what he had given to us? None of us had ever heard any music - not real music - till our first youth concert. Music had transformed our lives since then. Stoki had transformed our lives.

Not worth the paper it's hinted on

Sometimes it takes a
DJ to pop the proper
question. On Wednesday the hapless
Mr Michael Foot was let loose on the

Jimmy Young Show.

He chose this slightly improbable occassion to start rabbiting on about the need "to stop the outflow of money from this country." So, he said,

restore exchange controls. This would apply to pension funds, the same as any other money."

But in that case, suggested Mr Young, were not the pension funds to be denied the right to maximi-mise the return to the pension funds. mise the return to those whose security in retirement depended on them? By no means, he was assured: we absolutely guarantee that they will still be able to do

In fact you can search the length and depth of Labour's "suicide note" manifesto and you will not find that guarantee. What you will find is that: "we will make sure that public borrowing is financed through the financial institutions and national savings," and this a "National Investment Bank" will "put new resources from private institutions... on a large scale into our industrial priorities". They must have burnt the midnight oil over that world "mus".

over that word "put".

So where does all this get us?

Well first whatever else exchange controls might do they would not stop the outflow of money from this country, nor would they apply to

any other money.

Back in 1976 you could not send a Kruggerrand to your best beloved in Biarritz without the say-so of the Bank of England. Yet Denis Healey had to hitch a lift from Heathrow to the Treasury to catch the pound before it disappeared from sight.

Exchange controls, in short, won't stop the outward stampede of overseas investors when the markets take fright at the performance of a British government; nor can they do anything about the propensity of international traders who get the wind up to pay bills early and delay the collection of their debts. All exchange controls can do - and that imperfectly in the modern world of computerized communications and international banking - is to restrict the outward movement of funds in

British ownership.

That in itself, of course, is quite incompatible with a "guarantee" of unfettered freedom for the pension funds to place their money they think they will get the best return. But let that pass. What happens to the funds they are not

Jock Bruce-Gardyne

to believe Mr Foot that if the NUR oension fund wants to stock up with Rembrandts it will be free to do so? Or are we to believe the manifesto that it will have its peasion contributions "put" into the industrial priorities of Mr Wedgwood

It does not take much imagination to see what those would be: the Concordes, the de Loreans, the Meriden cooperatives, the stockpiles of unwanted steel, the free ships for Poland, Pity the luckless railwaymen with that lot between them and their

illusion, though, that lies behind the mirage of exchange controls. It is the charge that since Sir Geoffrey Howe scrapped them back in 1979, thousands of millions of pounds have been stashed away in foreign parts by British institutions which might instead have financed British jobs at home. For what would have happened had we not acted, and had the outflow not occurred?

Over the lifespan of the late Parliament we chalked up a current account surplus of some £13,000m. if there had not been a countervailing outflow of British investment overseas, then one of two things would have had to happen: (a) we would have accumulated reserves which would have meant that instead of private businesses acquiring assets overseas to yield a fat return long after North Sea oil has gone, the Bank of England would have acquired a lot of US Treasury bills); or (b) the exchange rate would have risen to the point at which foreigners decided to take their cash

from London. In neither case would a single extra job have been thereby generated here at home. Indeed, had the second route been followed, both exporting and competing with imported goods for domestic mar-kets would have been tougher. It is the ultimate irony that the politicians and commentators who ciamour for exchange controls should be the same who also vituperate about the "excessive level of the pound". It really is about time they spared a moment for the laws of mathematics. The author. Economic Secretary to

the Treasury, was Conservative MP for Knutsford. He is not seeking

Look, no hand-out – but they sell

Sometimes, picking my way gladly novelists, critics and essayists whose through the variety of pressing duties which come between me and the typewriter (a plant to water here, a picture to straighten there) I think about Anthony Trollope, If Trollope didn't invent self-discipline, he certainly patented it; sitting down to write at six each morning with, in front of him, the watch which urged him to produce 250 words every 15

At 9.30 am, having completed his daily 3,500 words, he got down to work - for the Post Office. Trollope, the patron of the pillar box, was a senior civil servant for most of his adult life and resigned from the service only in his fifties, when he fell out with the Postmaster General. The loss of his pension was no great hardship. He had already carned a comfortable standard of

living from a celebrated canon of literary work - without favour of subsidy, bursary, award, grant or even prize money. Trollope, like most writers before the second half of the twentieth century, never imagined that his spare-time scribbling was something which required help from the state.

I was thinking again about Trollope this week while the Irish-Canadian movelist Brian Moore was visiting Scotland to pick up an unsolicited £3,000 from the Scottish Arts Council. Moore - and in no way do I address my remarks ad hominem - is the sixth recipient of the Neil Gunn International Fellowship, which is one of the SAC's more sensible handouts.

The award is made every two years partly to honour the memory of a fine Scottish novelist (Neil Gunn died shortly before the fellowship was founded in 1972) and partly to honour and bring to Scotland writers of international distinction. Over the decade Heinrich Boll, Chinua Achebe, Saui Bellow, Ruth Prawer Jhabvala and Nadine Gordimer have held the fellowship and, with varying degrees of grace, endowed the Scottish salons with readings and lectures. Most have charmingly confessed that until the award, they had never read a word of Neil Gunn, and hurried to do so. None has yet admitted they had never heard of adopted a complimentary and conscientious attitude to their visit.

themselves a holiday. There is an argument for this particular piece of taxpayers' patronage: or at least as much of an argument as exists for sending MPs on fact-finding missions to Belize or Botswana. The exercise discourages parochialism. But perhaps it should

serve another purpose.

Perhaps the importation of successful writers able to support themselves without artificials aids should offer a silent lesson to all of Dickens, but at least they follow ROSS Davies | those British poets, playwrights, his example,

work is underpinned by the state and who seem unaware that most of the world's distinguished writers pursued their craft on a part-time basis, and rarely gave up other employment until their works had become profitable.

All the great nineteenth century writers had either full-time jobs or. like Flaubert, private means to support their efforts. Dickens is the supreme example of heetic industry. at one time editing four newspapers while producing his marvellous fiction on the side. Thomas Hardy didn't give up his job as architect until after the success of Far from the Madding Crowd, and Zola had delivered Therese Raquin and a body of critical essays before he ditched his humble clerical work.

Even poets have worked, often unglamorously. T.S. Eliot was a bank official and Philip Larkin is a librarian. But more writers have probably come out of journalism, the universities and teaching than any other discipline. An academic it is assumed, encourages reflection and provides the time; journalism nurtures the crude skills and maybe supplies some of the material, as Kipling, Graham Greene and Evelyn Waugh found.

It always gives me a kind of frenzied self-righteous pleasure to leaf through the details of the latest Arts Council "bursaries", as they like to call their hand-outs. This past year the Scottish Arts Council's literature allocation was £420,000. Some of this was spent on awards for published works and literary prizes; some was spent subsidizing the activities of small publishers, but £27,000 of it was distributed among writers in order (the magic phrase) to enable them to devote more time to their writing". From their curriculum vitae you can judge that most of them have given up gainful employment to do so.

The canon produced by some applicants often includes what you and I would call freelance journalism, the stuff peddled in the marketplace and declared to the Inland Revenue. In one or two cases nothing but a selection of theatre reviews or newspaper articles seems him. Some, like Brian Moore, have to be on offer. Can it really be right that the state should underpin the works of would-be drama critics or Others, like Saul Bellow, have essayists, who then receive the usual fulfilled the minimum requirement decent or indecent fee for their - the Neil Gunn Lecture - and had contributions?

Full-time journalists have also been known to write novels and plays. Staff journalists often take a legitimate sabbatical or unpaid leave of absence to find the time - or simply get up earlier. Freelance journalists also accommodate their creative ambitions within the framework of routine tasks. I know none who has applied for an Arts Council grant,

Just a local, violent, deceitful amateur That Radfield won hand-

Mr Neil Macfarlane, the Minister for Sport (until June 9 at any rate) has upset the football fraternity, an easily moved body, with remarks he made during a seminar on soccer disorder at the Centre for Contemporary Studies.

Could it be, the Minister asked,

that directors' thuggery and players' greed were as much a part of soccer mayhem as spectator violence? So saying Mr Macfarlane did not stay for an answer, but streaked out to try and get himself reelected for Sutton and Cheam, and so was gone before any toilet rolls could snake his way from that part of the crowd containing the likes of Mr Kenneth Bates, the chairman of Chelsea, and Mr Gordon Taylor, secretary of the Professional Footballers' Association. As the folks at the Centre for Contemporary Studies like to say, there is need for further research.

May I suggest, therefore, that if and when Mr Macfarlane and his heir or assignee return to the soccer question, that a Mr Martyn Bedford and a Mr John Hyam be sent for? Let us start with Mr Bedford. who would be able to speak from the perspective of a soccer referee who once was refused his referening fee

by a club secretary. Mr Bedford's sin had been to award a penalty to the other team five minutes from the end of the match - at which point, Mr Bedford, would point out, the secretary's team was winning 18-0.

Mr Bedford kicked off this soccer

season with an intriguing article in a bi-weekly local newspaper, the South London Press. In this piece, he discussed his experience of five seasons and some 200 matches as a referee of amateur football, Remarking that at park soccer level, a club secretary is also usually a linesman, Mr Bedford said: "If you ask him to watch his own forwards, you can be sure he will never wave his flag again...and if you tell him to watch the opposing team's strikers he will be miraculously transformed into an RAF semaphore." Bedford makes it clear that in the climate of skulduggery that pervades south London amateur soccer, it were folly to be otherwise.

He remembers one match where a secretary/linesman altruistically signalled that one of his own defenders had failed to scramble the ball off the goal-line. Mr Bedford duly awarded the goal, whereupon the game was delayed "while my linesman's team chased him across a neighbouring pitch." Mr Bedford, 1 should add, decided to hang up his whistle after disallowing a goal in a cup semi-final which led to his being chased across the pitch by eight players, whom he escaped only by locking himself in the changing rooms and then clambering out of a window.

Let us now turn to Mr John Hyam, who in any future seminar on soccer disorder will testify that he was once just such a corner-cutting club secretary as Mr Bedford describes. Mr Hyam was moved by Mr Bedford's memoir to write an article for a subsequent edition of the South London Press entitled "Confessions of a Crooked Coach". Mr Hyam recalls one youth cup

final at which the winning goal was scored by a player who had never even seen the side for which he was playing that very afternoon. He had been smuggled in from another team entirely after Radfield's own top scorer had been injured. The club went on to further glory by winning an under-15 league game with a side no member of which would ever see 15 again. The whole side had been imported from another league.

somely." Mr Hyam confessed, "was only one surprise for the rival secretary. He later met most of the Radfield "teenagers" in a nearby pub." Presumably the rival wished he had thought of this wheeze first. Mr Hyam's evidence would be of considerable interest in any future examination of soccer not just because it confirms Mr Bedford's strictures (in spades). The real point is that Mr Hyam's revelations are based upon ten years' manageria poltroonery which began in the late 1950s - thus placing this particular soccer disorder firmly in the days when the professional players still knew their place, which was in baggy pants, under zip-fastener hair-partings and on low salaries.

Where what Mr Bedford and Mr Hyam would have to say leaves Mr Macfarlane, I'm not quite sure. The minister may be right when he opines that gold fever fuels soccer madness, but given what this former referee and former club secretary have to say about what amateur players and managers will get up to for free. I'm not so sure.

Sir, Expressed more simply, Pro-fessor Bin Cheng's view (May 19) is the the liability of an airline should be absolute and unlimited, regard-less not only of whether it was at feath but the state of whether.

airlines.
Whilst the idea of "channelling"

whilst the idea of "channelling" liability to the operator may be appropriate in very special circumstances, such as in the case of the manufacture of nuclear energy, it is not so in relation to air carriage, where other indentifiable parties, such as manufacturers air traffic

such as manufacturers, air traffic-control authorities and operators of

other aircraft, against whom rights of recourse would not necessarily be available, might be responsible for

the damage suffered.

Although British airlines and regulatory authorities have led the

way in voluntarily accepting higher levels of compensation than those

provided for in the Warsaw/Hague system the concept of "airline-shop-ping" on the basis of the "best buy"

in this respect is questionable. There

is far more merit in constructing an international system of liability

which is comprehensive, consistent

and reasonably fair in its impact on passengers and operators alike.

On April 18, 1983, the Legal Committee of ICAO (International Civil Aviation Organization) adopted a resolution (by 34 votes in forces) and appears and page against the which

From Mr J. W. Woloniecki

Sir, Professor Cheng (May 19) may

well be right in saying that a system

of liability without fault to compen-

sate passengers for injuries sustained in air travel would save the airlines

money in the long run. However,

doubt if it would save the passengers

money.
Airlines, even I like to think in

my innocence, British Airways, are

costs of higher compensation and of

making provision for liability without fault, would inevitably be

passed on to the passenger in the

form of higher fares. At present the

intending passenger is free to choose: he can pay for his own

insurance, or pay more to "fly the

flag", or he can take the chance of

recovering too little, or nothing in the event of an accident.

HONEST MONEY

Prices have risen by four per cent in the past twelve months, according to yesterday's announcement. At that rate of inflation, prices will rise by 50 times in the next hundred years. A five per cent annual rise would give us an increase of 130 times in the same period. Yesterday's rise was hailed as an achievement, which it is entitled to be as the best figure for fifteen years, and the best in food prices for twenty years. However, by historical standards of price inflation in this country, a range of between three and five per cent is still very high. Moreover it is not a case of prices "coming down". They are not coming down. They are still rising. They are just rising more slowly; so a four per cent rise, though encouraging is still not good enough.

The election arguments about inflation seem to have taken second place to those about unemployment. That may be for two reasons. The first is that inflation is a "blur" word. It is not the same thing as rising prices, which may be caused by inflationary factors but need as inflationary factors but need not be. Prices can increase for a number of reasons. A sustained rise in prices, however, which is what we call inflation, is caused by an increase in the supply of money beyond the limits achieved by increases in production.

The second reason why politicians do not like to discuss inflation is that it has political causes, for which they are responsible. They advocate policies which they know cannot be paid for in real money, but have not the courage or honesty to admit as much. So they print dishonest money instead,

It is easier, therefore, to ignore that no economic system, and the necessary discipline of countering inflation and to focus on economy, can for long survive the pain of curing an inflated enconomy instead. It is easier to indulge in special pleading for particular victims, than to admit responsibility for causing a condition that, if not cured, leads to a much more general malaise afflicting all ages, and all sections of society, not just those unemployed people who are suffering the side effects of the cure. The idea that politicians have a choice of policy between inflation and unemployment is still peddled widely on election platforms. The figures for the past thirty years show that idea to be as false as the original deceit.

DECOMPRESSION PAINS

Before the military coup of 1980 JP, were the expression of politicians are still influential Turkey had something like a two-party system. Political life was polarized between the con-servative Justice Party of Mr Süleyman Demirel and the social-democratic Republican People's Party of Mr Bülent Ecevit. But neither was able to gain an overall majority. Nor could their leaders agree to work an elected parliament. Such a reasons for the paralysis of there is a strong majority party rival Grand Turkey Party, foun-government and the descent into anarchy and bankruptcy which president on the main lines of coup de grâce to the president's policy. The generals who took power at that time, having pushed through their own constitution and obtained popular rapification of it last November, have now allowed new political parties to be formed in preparation for elections in November of this year. The old parties and all their leaders are banned from politics for ten years. Four new parties have been formed under the new constitution this week, and a fifth is expected next week.

But already President Evren and his colleagues are finding out what so many authoritarian would-be liberalizers have found before them, from Louis Napoleon to Sadat: liberalization does not work, indeed does not mean anything, unless you let people do what they want rather than what you want.

Of course no Turk in his senses wants to go back to the and among them the RPP and

genuine opinions and forces deeply rooted in Turkish society.

Mr Evren, by virtue of last November's vote, is president for seven years under a consti-tution which (like the French) allows the president to appoint the government but requires that the latter enjoy the confidence of Sünalp. Mr Sünalp was first off the Interior Ministry on Monday after a well-publicized meeting with the President last week. But even before that party was officially announced, things were going on unofficially which, moved the president to express his displeasure in strong terms. Caucuses of former leaders and members of the old parties were being held to discuss tactics and to decide behind which, if any, of the new parties they would throw their weight.

If the former parties and their leaders were as thoroughly matters very much to the discredited with the people as majority of Turks, who are still the regime's rhetoric implies, deeply grateful for civil peace such goings on would be of little even if many of them have taken significance. WHEN THE LAW SUPPOSES

In his Hamlyn lectures this week, Lord Hailsham called for fresh thinking about the drafting and interpretation of statutes. His timing could hardly have been better. The tide of judicial complaints about the difficulty of understanding modern statutes is rising fast. Last week Lord Lane, the Lord Chief Justice, criticized the convoluted state of the legislation governing driving offences and pointed out that it would be very surprising if judges did not make mistakes in this branch of the law. A few days previously Lord Diplock, the senior Law Lord, echoing the views of Sir John Donaldson. Master of the Rolls, criticized the lack of clarity in the legislation governing industrial relations.

These are serious matters. The rule of law, which is the foundation of any parliamentary democracy, depends not only on people accepting that they should obey the law, but also on their being able to find out what it is. If even the judges are having difficulties, there is real reason for concern.

Can laws be written for the man in the street? Modern society is so complex, and the social policies involved in legislation so finely tuned, that in most cases this can be no more than a pipedream. If the dream were ever to be realized, it would soon turn out to be a nightmare, because the laws would have been drafted in such general

wide measure of discretion to the depend on its meaning. courts.

How can the present shortcomings of modern legislation be ovecome? Some of the symptoms of the disease are more easily treated than others. In last week's case, for instance, Lord Lane pointed out that driving while disqualified involves considering no less than two statutes, four sections and three schedules. One way of remedying this kind of evil would be by ensuring, as far as possible, that where a statute needs to be amended this is done by reenacting the whole statute, or complete parts of it, in amended form, so that the rules can all be read in a single document.

Another irritant is our legislators' present habit of bringing different bits and pieces of a statute (sometimes even different parts of the same section) into force at different dates, none of which are specified in the statute itself.

The fundamental problem is, however, much more intractable. It is the style of legislative drafting itself. Statutes have become too long, too detailed and too turgid. Sometimes the gobbledy-gook is so extreme that They are not so amusing, however, for those who have to no alternative if the law is to understand the law, and for remain accessible to the people. terms as to give an unacceptably those whose every-day decisions

To some extent the judges must share responsibility with the draftsmen for the unsatisfactory style of modern legislation. They have in the past tended from time to time to adopt an over-literal enterpretation of the words of a statute, sometimes at the expense of its purpose. This has led the draftsmen to draft in ever-increasing detail, to cover every possible contingency, for fear that otherwise the courts will declare that something which was plainly intended to be included in the statute has been left out. If there is to be a change in legislative style, the draftsmen will need the full cooperation of the courts.

What seems to be needed is some movement on both fronts: (a) a broader style of legislative drafting on the one hand, and (b)a somewhat more purposive approach to statutory interpretation by the courts. As Lord Hailsham has pointed out in the present jungle of statute law it would be an imprudent judge who did not take into account the main legislative purpose of an Act, and the political and social context in which it was passed. It is probably inevitable that greater simplicity in legislative drafting will confer a greater examples are published in the ive drafting will confer a greater press for readers' entertainment. discretion on the courts in intepreting statutes, but there is

LETTERS TO THE EDITOR

the election

From Dr Brian Harrison

Sir, I wonder whether you are right to say (May 18) that the party leaders' presidential or "personal-ised" general election campaign dates only from 1959 and originates with television? It was prime ministerial success in war that enabled Palmerston, Lloyd George and Churchill to dominate the general elections of 1857, 1918, and 1945, respectively, and it was campaigning zeal plus an exciting issue that clevated Gladstone to such heights in 1868 and 1886.

And, as Joseph Chamberlain in 1900 and Lloyd George in January, 1910 show, one does not even need to be a party leader to gain such prominence. Indeed, a party leader may sometimes think it best to advertise his "team" at an election, as Harold Wilson did in October 1974. Some elections – 1895, 1906 and October, 1974 – have not been providential at all

presidential at all.

Of course television capitalises on political excitements, but it is only the latest among several media developments whose political impact has been exaggerated: radio, the popular press and the public meeting all provoked similar com-

ment in their day.

Much more important than any linear and technological trend as an influence on campaigning style is surely the more fluctuating impact made by the combination of personality, policy and circumstance

whereby the politican applies his
traditional skills to the mind of the

In 1868 this combination proved the salvation of one bad speaker; according to Bagehot the candidate, when asked to explain his success, replied "oh, when I do not know what to say, I say 'Gladstone', and they are sure to cheer, and I have time to think". Yours faithfully,

BRIAN HARRISON, Corpus Christi College, Oxford. May 18.

Holding the line

From Mr Stanley Lees

Sir, I am pleased that Mr. Gower (May 16) has drawn attention to British Rail's plan to quietly close the spectacular Carlisle-Settle line, probably within 18 months. The official reason is that the magnifi-cent 24-arch Ribblehead viaduct is now structurally unsafe and four trains daily do not justify the restoration costs. The unofficial reason suggests a policy of planned

As far back as 1967 BR knew from survey reports that the viaduct needed restoration. Instead of starting while the project was of manageable size, the decision was made to quietly run the line down, culminating in the withdrawal of the passenger service between the west of Scotland and the north Midlands. The long-term strategy must be to

develop the line as a revenue earner for the area. There are several private steam railway companies in the north who require to redefine their role. Instead of being custodians of railway heritage, they need to come together in an entrepreneurial way to work the line. The experience of the Pfestiniog railway shows what can be done.

If these bodies can unite with

some local authority support the prospects of preserving a unique piece of history are good. It is asking a lot from voluntary bodies, but they start off with an asset far richer than money - staff committed to the organization and believing in what

they do.
That is something which cannot be claimed by our most profitable institutions, or British Rail. Yours faithfully, STANLEY LEES, 96 Chesnut Lane. Amersham, Buckinghamshire.

The Denver Boot From Mr Roderick Parker

Sir, Motorists in London who park illegally now risk having their cars immobilized by the police with wheel clamps. Necessary although it no doubt is to further deter offenders, I wonder if it is the best approach. Apart from the sheer time involved for the traffic wardens and police in attaching (and one hopes eventually removing) the clamps, there is a veritable array of accompanying paraphernalia, in-cluding special "Clamp Unit" police vans, specially printed stickers for the offenders windscreens etc.

Before this vastly expensive exercise is repeated across the country, would it not be better to look into linking the payment of parking fines with the road fund tax computer? Switzerland has done this for

years. No road fund tax disc for next year until you have paid all outstanding fines - very simple and very effective. Yours faithfully.

RODERICK PARKER, 9 Bovingdon Road, SW6. May 16.

From Mr D. A. R. Williams

Sir, ha my simple way, I had assumed that the purpose of parking restrictions was to prevent obstruc-

tion of the highway.

As parking fines seem to mean little to so many, can someone tell me how the interests of the public are served by ensuring that an obstruction remains in place? Yours faithfully.

Television's role in Press reports on Israeli war conduct

From Mr William Frankel Sir, As the source of the words you

quote in your leader, "Friends beyond the need", (May 16), I hope you will permit me to comment on the selective quotation and the polemic you construct on that foundation.

The context of the quoted phrase is important. What I said, in opening the symposium on Institute of Jewish Affairs, was:

No other event since the creation of the State of Israel has so exercised the consciousness of Jews throughout the world as the war in Lebanon. Various opinions are held as to its necessity and the manner in which it was conducted.

But one one issue there is withal But on one issue there is virtual unaamity and that is that Israeli actions were vilified and distorted by the Western media: that the case for Israel was not presented at all or misrep

I fail to see any grounds for inferring from these words, as does your leader, that I am an apologist for the Begin government. In fact, I have opposed many of its policies, as reference to a number of articles i contributed to your columns between 1977 and 1981 will confirm. It is surely contrary to your own normal standards of discussion to attempt to deflect criticism by impugning the bona fides of the

At the symposium strong criticism of your coverage of the Lebanon war was expressed. Rather than replying to any of the specific criticisms that have been made, your leader casts aspersions on those who have made them.

Your leader writer seeks to justify your coverage of the Lebanon war by claiming that similar criticisms were published in the Hebrew press. The justifiable and informed criticism in those newspapers ought not to be employed as a white sheet to cover some of your own reports and comments which were neither. Regrettably, the tone and language of your leader compound the earlier offences. It is false, irresponsible, prejudicial and highly offensive to describe Jewish critics of the media as "expatriates". It reveals perhaps more than was intended that this term should be applied to a group of British citizens.

Your comment that "Israel's apologists in the West (i.e., the critics of your Lebanon coverage) suggest that it was Israel which was a greater victim than the thousands of

innocents who died is also unwarranted. Nothing remotely resembling this suggestion was ultered at the symposium, nor am aware of its aware of its expression by any responsible Israeli or Jewish source. It grieves me to write in this fashion to a great newspaper with which I felt privileged to have been associated. But I cannot refrain from responding to a statement of editorial opinion which departs so seriously from accepted standards of journalism and constitutes, to apply

your own words, "a collective slur" on the majority of the Anglo-Jewish

community. Yours etc. WILLIAM FRANKEL, 5 Pump Court, Temple, EC4.

From Dr A. I. Miles

I, too, did not agree with that war. despise Sharon and his policies and I know at first hand that war is a terrible thing. On the other hand, to report the Lebanese conflict simply from the point of view of the casualties and destruction brought about by the Israeli aggression without reference to the antecedent history, blurring the fact that Lebanon and Beirut had been devastated and raped for years prior to the Israeli invasion by the PLO was deplorable.

Deliberately to use descriptive terminology previously reserved for Nazi atrocities, was to display a prejudice which I found deeply

Repeatedly and sickeningly to describe the Sabra and Shaatila massacre as though it were committed by Israelis, when the perpetu-ators are Arabs still running free in Gemayel's Beirut was not only dishonourable but also a clear incitement to racial hatred in this country, against those British citi-zens you have chosen to call "expatriates".* Sincerely.

Naturalization cost

From Mr Roy Tindle

Sir, The All-Party Home Affairs Committee have recommended cuts in the level of fees charged for naturalization and for registration for British citizenship. They have observed that the Home Office stands to make a profit of £6m through the charges currently made. There is a justifiable assumption that the making of profits is hardly relevant to such an activity and that those who wish to become British.

For those in full employment, earning reasonable salaries, perhaps the charges may be regarded as reasonable. However, the ethnic minority groups from whom such applications will come, are suffering more greatly than most from unemployment. There is no supplementary benefit payment made to such people for this expense. The issue is compounded when one considers the plight of refugees. By the act of ficeing their country of nationality they have become stateless with all the connotations of

Labour Party unity

From Mr John Chapman Sir, James Curran's article, "The message Foot must get acrosa" (The Times, May 11) contains certain inaccuracies. From Brigadier Sir Gilbert Heath cote Sir, Why is nothing being done to control the increasingly intrusive noise from motorcycles? Often it seems they are ridden with the sole purpose of making as much as

Not long ago the country was up in arms about two or three daily flights by Concorde; more recently Parliament's time has been taken up with the effects of larger lorries on our roads. But anyone living near a main road, as well as your columnist Joanna Lumley (May 4) will agree that neither of these cause as much irritation or discomfort as the vicious blare of a hard-ridden

motorcycle. The contrast is heightened when one knows that the former are going about their business whereas the single rider howling through his gears, often late at night, seems bent only on making his presence felt. How well he succeeds!

is, it was deemed that they would have no opportunity of returning to Vietnam and therefore they have been allowed to remain in Britain for an indefinite period. Yet when I asked the Home Office about the possibility of free acquisition of citizenship I was told that this would be too costly and that it would occasion an increase in charges to other applicants.

Statelessness should be abhorrent to any civilized community. If people are to remain in Britain indefinitely what reason can there be for denying them a simple guarantee of security? Perhaps this recent report and the forthcoming general election may give cause to our elected representatives to think

> In 1983, as in 1944, the image remains as vivid and applicable as ever. But Christians, he said, could not rest content with ironage surliness. "In the light of the Gospel and the Catholic prin-ciple, this is false logic. Christ came to break down those barriers. The central point of his teaching is charity, that is the love which binds us to him, the first born of many brothers".

It is not difficult to see that everything John tried to do as Pope was already implicitly contained in the 1944 sermon in Istabul. There are those who say In 1944, the darkest year of the war, in his cathedral of the Holy Spirit in Istanbul, he was doing. But his sense of the centrality of Pentecost reaches much farther back, in fact to his seminary days. On the eve of Pentecost in 1899 he was chosen to deliver a homily on the control of the church as the fast of the church as the first of the church and vibrant. He drew upon it to the state the simple but far reaching and vibrant. DR PRIDI PHANOMYONG

Sir Andrew Gilchrist writes: . May someone who knew Nai Pridi (sometimes known as Dr Pridi Phanomyong) for nearly 50 years add a few words 10 your obituary notice of this remarkable but unfortunate Thai statesman.

Pridi was a sincere democrat and was never in any doubt where the best exemplar of democracy was to be found. His pro-British stand during the war is well-known, but it should be remembered that even before the war he had been made G.C.M.G. by the British Government, a recognition of the civilized way in which, as Foreign Minister, he had nego-tiated the termination of the of his birth.

extra-territorial rights in Thailand which Britain still enjoyed. From the outset of the Far Eastern war. Pridi began to plan against the Japanese invaders, using the designedly innocuous Regency post to which he had been appointed by his rival, Field Marshal Pibul, as a base for a wide-ranging resistance movement. Contact with this resistance movement was established first by British and then by American secret para-mili-tary organizations, with the threads running back to SEAC in Kandy, As Mountbatten himself put it "It was a unique

relationship because a Supreme Allied Commander was exchanging vital military plans with the head of a State technically at war with us He never failed us." Thus it was that Thailand. which under Pibul had entered

the war on the wrong side, emerged from it under Pridi on the right side, a factor of Martin, Mr Arthur George Edwin, enormous importance in the manufact of Bradwell Rusby Progress of ordered prosperity Heston.

on which Thailand now em-

barked. But it did so without Pridi. and not invariably by paths which Pridi would have chosen. His enduring contribution to That history had been made.

Pridi was overthrown by domestic adversaries when he was on the peak of his powers. His long exile first in China and then in France began when he was 48, and he was 83 when he died. Though it was natural that he should regret lost oppor-tunities, he was never embittered, securely confident that his name and his ideals would not be forgotten in the country

In times of turbulence and danger, Pridi showed himself both a brave and a gentle man; and his widow Phoonsuk is woman whose qualities matched his own.

Sir Norman James Watson, Bt., who died on May 19, at the age of 86 was the second holder of the baronetcy created in 1912. In the First World War he joined the King's Royal Rifle Corps, was attached to the RAF and served in France; in the Second World War he was again. with the RAF in the Volunteer

A Fellow of the Royal Geographical Society, in 1934 he organized an expedition in British Columbia to traverse, using skis, the greatest group in the coast range, the Waddington massif, about 200 miles from Vancouver. His other main interests included aviation and farming, and he was for many years chairman of an aircraft manufacturing company at

For 15 years Ponting ran the Fund, almost single-handedly, with a skill, enthusiasm and dedication which excited the admiration of all who knew him. Many people did know him for he became the authority to whom all turned for advice on the historical techniques and practices of the woollen industry. He travelled and lectured widely; was joint-editor of Textile History; and wrote numerous articles and books including Leonardo Da l'inci's Drawings of Textile Machines and (with D. T. He also found time to write a dissertation which won him the M.Litt degree from the University of Bristol. Yet wool was by no means his only interest. He enjoyed good food and wine (on which he was knowledgable an expert on the history of lawn tennis (in his youth he had been an above-average player); and his bubbling conversation was as likely to turn to poetry or parish churches or historic houses as to wool-spinning or knitting frames. Mayfield was known in this country as well as in the United States both as a collector of books and manuscripts and as one of the most knowledgeable men in the field of 19th and 20th century English and American literature. At the time of his death he had not only collection of books and manuscripts by and about the poet Algernon Charles Swinburne, but was widely acknowledged as an authority on Swinburne's life and works, about which he published a stream of articles over a period of about 30 years.

Maybeld's devotion to the noct was of mythic proportions. In October, 1977, he announced the acquisition of his 101st copy of the first edition of Swinburne's Atlanta in Calvaon, an enterprise undertaken in order to disprove the statement of Thomas J. Wise, a notorious bibliographer, in his bibliography of Swinburne, that of the first edition only 100 were printed. Not for Mayfield the pedestrian compilation of a census! He was also wont to send his friends in the Swinburne faith presents such as Tee-shirts printed "Swinburne Still Lives", or jig-saw puzzles bearing the poet's well-known

features. As a collector Mayfield was distinguished by his unfailing courtesy and helpfulness to scholars, whether learned editors or enthusiastic undergraduates. His collecting career was dominated by the belief that books and manuscripts were the raw materials of scholarship. not nuggets to be hoarded. In recent years he was quoted often in the press in the United States as an opponent of the concept of collecting for investment, a practice he deemed restricted to "avaricious idiots". Several institutions both in

this country and in America, among them the British Library, were indebted to Mayfield for his donations of books and manuscripts. He was an active member of the Grolier Club in New York, of the Rowfant Club in Cleveland Ohio, and of the Authors' Club in Washington, D.C. He was a founding member of the Manuscript Society in 1948, and was a long-time member of the Bibliographical Society of

Mayfield was born in Meridian, Bosque County, Texas, in 1904, and was educated at the University of Texas and Southern Methodist University. After service in the Navy during the Second World War he returned to the Civil Service. From 1961 until his retirement in 1971 he was Curator of Manuscripts and Rare Books at Syracuse University, where he was also editor of the Courier, a bibliophilic and literary quar-

Mayfield is survived by his wife Edith, who shared with him his many bibliographical interests, and often accompanied him on his literary expeditions.

21-27 MAY 1983 A WEEKLY GUIDE TO LEISURE, ENTERTAINMENT AND THE ARTS

Chelsea's darling buds of May

From wildly exotic to extraordinarily ordinary, the Chelsea Flower Show is the supreme exhibition of plant life.

Anthony Huxley, a veteran of the event. previews next week's sixty-second show

The Chelsea Flower Show is one of the great institutions and pleasures of the English year. More than thirty annual attendances have turned it into a kind of impressionistic tableau in my mind, but I can still recall some of my feelings on my very first

In 1949, I had just joined the staff of the weekly magazine Amateur Gardening and I knew something about the plants and gardening but virtually nothing about the horticultural industry. In May, the editor marshalled his team, each of whom was to write up a section of the show.] was very apprehensive and totally unprepared for its magnitude, the great double row of various stands that greets the visitor at the main entrance, the vast marquee around the corner, and what was within it.

What extraordinary plants were there – plants I had never dreamt of What familiar plants grown to incredible size and perfection! What gardens - the rock gardens most awe-inspirone could hardly believe had not been there for years yet were to be dismantled after the show. It seemed impossible for me ever to come to terms with the diversity of garden plants and their cultivation. I wandered in a daze till one of my colleagues reminded me that we had to piece the show report together

Show, and a privileged one, too. was able on press day to see it in its most perfect, new-minted condition, without the crowds. Chelsea continued to be a mine of horticultural knowledge, especially as time went by and I began to know the begetters of that knowledge, the growers and nurserymen as well as all those horticultural cognoscenti who come on press day to take part in the meetings of the RHS tive displays from horticultural committees, judging exhibits

The time is late May but there will be February snowdrops and aconites, summer lilies and annuals. Behind the show lies' months of preparation, weeks of carefully orchestrated forcing and retardation. It is a major exercise to create a Cheisea stand, assembling the material in the best possible condition, transporting it, setting out the plants and any props, and maintaining it for the show's four public days. It is not only cut blooms that begin to look past their best by Friday - many of these are replaced midweek - but shrubs like mododendrons: the dust and stuffy atmosphere take their toll

To the west is Madagascar, some 500 miles away, and to the east there is nothing but the Indian Ocean until you reach Perth.

Port Louis, mountains covered in green rising high above it, must look a good deal better from the sea than it does on foot And it was from the sea and the approach to Port Louis's harbour that visitors as diverse as Charles Darwin, Joseph Conrad and Sir John Pope-Hennessy, the most dis-tinguished of the island's Governor-Generals, got their first view of Mauritius,

Almost no western tourists now give Port Louis more than the courtesy of a half-day tour to pay their respects to the stuffed dodo in the museum behind the esplanade running up from the harbour, and perhaps, if they have a smattering of omithological knowledge, a similar obeisance to the

Equal rewards are coming from the Mauritian kestrel: in the course of a morning I spent with Jones, and a cageful of tropical bats (fast disappearing in Rodrigues) two kestrel chicks emerged from their shells, putting the known world population up from 14 to 16, at least for the time being.

The "golden age" of Athens refers to the time when Pericles, statesman and general, ruled the city and its allies (461-429 BC). He took the money contributed by the Confederacy of Delos and intended for the reconstruction of the Athenian fleet, and used it to rebuild Athens to the glory of Athena Parthenos, the virgin goddess.

Between that time and the present, which included almost 400 years of neglectful Turkish rule, the city became little more than a ruined village. Turner painted the Acropolis in 1822. Tis living Greece no more",

A savagely constructed motor road cuts the journey time to Delphi by almost half, but even so you really need two days to see the site and museum properly.

The Sanctuary clings to the mountainside, dramatically poised above a chasm lined with olive trees leading to the distant sea.

It is well worth the climb up the zig-zag Sacred Way to the temple of Apollo, home of the Delphic oracle, and thence to the theatre. Look at the view while you get your wind, then press on to the Roman stadium Heinrich Schliemann, the hidden in the trees above.

I have mentioned only two of the many one-day tours; there are several others. Furthermore you can usually arrange stopovers. The companies also list many short tours of up to four days by land, sea and air.

Timely attraction of Swiss travel

excursionist" gathered a flock of 64 ladies and gentlemen for the first ever organized trip of Switzerland and the packaged deal was born. "With cheap tickets to the Mont Blanc" it cost a total of £19-17-6 and lasted 21 days. By our standards it sounds more like an endurance test, guests having to rise at sunset to make an early start, riding in uncomfortable coaches on rough and tollsome

roads. But then the Victorian traveller in Switzerland must have been extremely tough; one only has to look at photographs of ladies crossing glaciers in a crinoline to marvel at their courage. The conquest of the Matterhorn two years later was another momentous event to captivate the world. A group of eight British climbers led by Edward Whymper, starting from Zermatt, beat their Halian rivals in a race to the top. But the joy of victory was short-lived. On the way down a rope snapped, precipitating four of the members to their death. There was a lengthy controversy about the rope which

atil persists today.

By the turn of the century, Swiss holidays were all the rage, with sumptious hotels, vast Edwardian palaces on the lakes and in the Alps. Fashionable society held court among the rocks. Sir Edward Cassel, the millionaire banker, built his own baronial half on the edge of the Aletsch Glacier, where with a staff of 12 ha antertained the rich. Everything quests included - had to be brought up by mule from Merel, 4,000 ft below. The Villa Cassel is now Switzerland's first educational centre where people can attend five day courses on alpine flore, geology, forestry and game. Swiss hotel ploneers set a new high standard of hotel keeping that has never been surpassed. One was, Cesar Ritz, whose name became a synonym for quality and ection although he was fired from his first job as a waiter at the Hotel Couronne et Post in Brigue, being told that to succeed in

business one needed fizir. Assunder Saller at the Hotel Monte Rosa in Zermatt used the conquest of the Matterhorn to promote his unknown village and put it on the map.

From vintage cars to antique lace, here comes Beryl Downing with the successful formula for a perfect wedding day

Complete guide for a busy June bride

June, moon, spoon may still be the recipe for the perfect romance, but you need a good many more practical ingredients to manage the actual wedding. Marriages are increasing at the rate of about 1,000 a year, so on the basis of the latest (1980) figures - 370,022 weddings in England and Wales - mothers of 1983 brides may have quite a bit of competition for caterers, florists, cars and photographers. Here are some suggestions to help plan the perfect day.

Flowers. Caroline Evans, Unit C, 49 Atalanta Street, London SW6 (381

As a change from conventional arrangements, flower trees make delightful wedding decorations and are one of the specialities here. A bay-shaped tree 5ft high with a spread of 3ft-4ft costs about 260. Composed of daisies and ribbons, it looks delightful; or you can choose flowers to match your own theme. Caroline Evans likes to visit the venue with the bride to discuss colours. Bouquets are from £21, pedestal arrangements from £50. She also does wedding arrangements and bouquets

Several flower artists provide permanent mementoes of the wedding day by turning flowers from the bouquet into framed pictures. Usually they send special containers before the wedding day so that the bouquet can remain as fresh as possible and brides can choose to have the whole bouquet pressed and reassembled in the pressed and reassembled for the pressed and reassembl made into an original picture. Ask for brochures showing frames and

Frames and Flowers, 11 Greenbank Drive, Bollington, Cheshire (0625 72815) Pictures made from bouquets cost from £27.50. This studio also specializes in dried flower pictures in tones of gold and silver for wedding anniversaries or in any colours of the client's choice.

Anna Plowden, 30 Bridle Road, Maidenhead, Berkshire (0629

Anna becan to make flower Anna began to make nower people's flowers because her husband Anthony, a keen gardener, couldn't bear her to pick his flowers for the house. He now growe rare varieties of foliage for her to use in her pictures and also does the framing for her - a happy compromise. Prices are from 28 for miniatures to £150 in glided Italian frames.

Yvonne Saunders, 70 New Street, Great Dunmow, Essex (0371 3986) Yvonne offers a particularly romantio touch by mounting her flower pictures on fabric left over from the bride's dress. Plain silk or valvet mounts are also available in a variety of colours. Prices from

Foye Forge, Fowey, Comwell (072 883 2248 or 072 681 2379)

A single bloom from the bride's bouquet can also be preserved by plating it with gold, silver or copper. The flower, its stem wrapped in moist cotton wool, must be packed in a strong carton and posted first class to arrive fresh; the service takes about four weeks. Prices are from £17.25 in gold plate for, say, a treesla; £14.95 in säver, £11.50 in copper. When they switched from: blacksmithing to plating 20 years ago Foye Forge were the first to plate leaves and acoms as jewelry; they also plate babies" first shoes,

Cakes

Anne Fayrer Cakes and Flowers, 66 Lower Sloane Street, London SW1 (730 6277)

Hand-painted wedding cakes with co-ordinating flower schemes are the speciality here, although Anne Fayrer will also design and make totally unconventional cakes – one interior designer had a two-tier cabbage shape and when the pale green looked a little bland, had it enlivened with pink caterpillars. Single tiers cost from £35, three-tier from £65 and they can be supplied within two to four weeks as there is always a stock of rich, brandy-laced cakes (which need at least six weeks to mature). Bouquets are from £45. bridesmaids' posies from 220. church arrangements from £40.

Cars and carriages

Getting Married, 201 Welworth Road, London SE17 (701 1750) An open landau or a Victorian glass coach drawn by a pair of bays or greys and accompanied by two attendants in livery are available for weddings anywhere in the country. The equipage and horses travel from the stables by lorry and set up near the bride's home to take her to the church and reception. The basic cost is about £250 - more for long distances. Also on offer, a: complete service, including photography, catering, flowers, wedding dresses - all done by the

Traditional British tipple that is ripe for revival

ted Kernel would probably stump every Mastermind contestant. The answer is that they are all traditional cider apples. And while these old varieties toeether with the rough, raw. cloudy furnhouse ciders or acrumpy that every farmer's wife made from windfalls and damaged fruit, are rarely seen today, the cider industry is enjoying a renaissance.

Not only have cider sales doubled in the past decade, but last year cider notched up a beffy 20 per cent increase on the previous year - virtually the only area of the depressed drinks trade (apart from white wine) to show any increase at

This cider revival may well have followed in the wake of the Campaign for Real Ale, and the belief that returning to tra-ditional English tipples is a good thing. But I suspect that shrewd cider drinkers have discovered that cider is not only slightly cheaper than beer but is also several degrees more alcoholic, making it the most alluring alternative to wine. It is difficult to pinpoint exactly when cider was first fermented but the Celts have always been associated with this drink and Celtic mythology is full of references to cider and the apple tree, which they considered sacred; so although the French would have us believe that our cider-making skills crossed the Channel with the Norman conquest, the truth is that cider had been made in this country ever since the first apple crop was gathered - and that was long before the Romans arrived, let alone the

War when French wine be scarce and the gentry had to fill of wine. But it was not until the late nineteenth century that the wild yeasts that caused violent and unpredictable fermentations were isolated and fine ciders rather than scrumpy were widely available.

Today cider is made principally in the West Country, in-Herefordshire and Gloucester-Devon, and to a lesser degree Norfolk and Kent, with the three major companies of Bulmers in Hereford, Taunton in Somerset and Coates Gaymers, based in Somerset and Norfolk, carving up most of the ter after a year or so of bottle cider market between them. But age, but few of us I suspect will scrumpy is still made on hundreds of different farms in every cider county and my long before then. No 7 is often referred to as a connoisseur's cider – a misleading phrase, for this gutsy amber-gold cider is full of apple flavour, and, apart from a somewhat rustic dry finish, is I think actually rather easy to drink. No 7's low sugar content (less than 0.35 per cent) makes it ideal for diabetics. (The half-

sparkling Normandy ciders that are a good foil to the still traditional English ciders. One naturally sparkling cider from the Cideries Réunies at Le Theil in Normandy, whose handsome golden-orange colour and fresh flowery apple fragrance and taste really is very good indeed. But make certain you buy the dry sparkling cider, for the sweet and medium sweet versions are not as good. (Safeway, 85p; Arthur Rack-ham, £1.29; Cullens £1.29.)

captured the remaining nine Essex wickets to complete a thoroughly deserved victory. It kept alive Sussex hopes of reaching the quarter-final round in the Benson and Hedges Cup, with everything dependent on their game with Hampshire at Hove on Monday. Essex failed to mount the challenge that might be expected from an unbeaten side, but they are already assured of a place in the last eight. They resumed needing 162, from 43 overs but Pringle was the only 21.3 overs before the rain mocked their efforts. The one point which went to each leaves four of the five counties in Group B with 2 chance of qualifying for the quarter-finals of the competition. Everything depends on today's matches. Surrey's sleepwalkers

I believe it was Lord Hartington, in the 1980s, who dreamt he was speaking in the House of Lords, and woke up to find he was. I was reminded of this by the early Surrey batting yesterday.

They still seemed unsure whether

they were awake, or in a morphean twilight. This is not a criticism of the batsmen, just an explanation. So rarely have they had a bat in their hands in real contest this season that they could be forgiven for

that they could be forgiven for thinking it was all a dream.

It must be said for Glamorgan, however, that they had woken to the alarm clock, sounded by their new captain, Selvey. He and Nash made the ball swing, under the heavy skies, and Surrey, after winning the trees hatted languidly.

Selvey brought on Lloyd, of whom one still thinks as "the young off-spinner", although he has taken more than 200 wickets for Glamorean, and was born at Neath 30 years ago. They grow their plants to last at Neath: more stubborn

Lloyd bowled well, but it was Nash who got the next wicket, Butcher leg-before at 49. Nash bowled his quota through, and finished with 2 for 21. Neither Knight nor Howarth looked at ease. Knight was caught at the wicket off Rowe, who also bowled off-breaks, at 68.
Then it rained, but only for 10

minutes. All morning the clouds had lain ominously about, and the skies, and Surrey, after winning the toss, batted languidly.

Clinton was leg-before in the first over. Butcher and Smith progressed uncertainly on a pitch which was slow but of doubtful bounce. Smith, trying to shake off caution, had a heave at Nash and was leg-before at believed to the story of the st

nt Lynch back. The score had reached 142 in the 45th over, when Wilfred Woller appeared on the pavilion balcony. I have written about this Cardiff balcony before. It has a large sign saying that you may not sit on it nor stand on it, and there is, I understand, a terrible Welsh curse upon anyone who transgresses. Wilfred, never a superstitions, man, hauled a chair out of the bar, and plumped himself in it, facing the sign.

Good varied bowling on a slow pitch, kept the scoring down until Jesty cut loose with strong drives to complete 50 in 29 overs and 113 minutes. With Pocock, 50 was put on in 11 overs and the fifth pair, driving strongly with much confidence, steered their side to victory with seven overs to spare. Captains upset at umpires' decision

Middlesex's Benson and Hedges Cup match against Combined Universities was abandoned by the umpires. Ray Julien and Nigel Lewis, when they took a brief look at the sodden Lord's ground yesterday. But the decision to call it off as early as 9.15 am upset the captains, Mike garting and Steve Henderson, who expected to be

Mr Wright said: "Although the umpires' decision "Although the umpires" decision seemed the right one, in view of the conditions, the captains were not consulted or informed. Neither Gatting nor Henderson would comment. Middlesex took one point from the game, as they did when their match with Glamorgan was washed out at Uxbridge on Wednesday. This ensured their qualification for the quarter-final round. A win for Universities could

Southgate trounce French champions in fine start

Southgate. Southeate made a heartening start in their attempt to regain the European club championship by ncing the French champion

pinch here yesterday.

Although plagued by fitness problems, Southgate prospered by concentrating on high-speed attack along the flanks and by being in readiness to receive the hard centres described from these areas. Three desnatched from these areas. Three goals scored in this manner suggested that a lot of practice had gone into perfecting the ploy.

Maximova to boost. **Head collection**

By Our Irish Racing Correspondent, Dublin

Mysterieuse Etoile and Maximova need her share of luck if she is to avoid the fate which befell last week's Irish 2000 Guineas favour-ite, Lomond.

Maximova, a stable companion of the English 1000 Guineas winner Ma Biche has likewise made the journey from Chantilly to attempt to qualify for classic hobours. Last to qualify for classic honours. Last season Maximova put up a series of top-class displays, winning her first five starts over six and seven furlougs including a dead-heat with Deep Froots in Prix de la Salamandre, a valuable contest won by only two other fillies in the past 20 years. But for being boxed in, Maximova would have won this race outright, and it was significant that Crystal Glitters who finished fourth to Wassi in last Saturday's fourth to Wassel in last Saturday's Irish 2000 Guineas was three lengths behind the dead-heaters in third place.

Today's race will furnish valuable

clues for the identity of the top European filly at a mile for John Dunlop, the trainer of Wassl, is taking on L'Attrayante an the Irish

No winner of the Poule D'Essai des Pouliches has ever previously competed in an Irish 1000 Guineas, a fact that will attach particular significance to the challenge of L'Attrayante in this afternoon's Goff's sponsored Irish 1000 Guineas at The Curragh.

L'Attrayante, beat two old rivals Mysterieuse Etoile and Maximova

Glasson Lady, the remainder appeared to be outclassed.
Between them Flame of Tara and Glasson Lady have already won five times this season and it is significant that Declan Gillespie, the stable jockey, had no hesitation in picking Flame of Tara. She was not over-impressive at The Curragh last time out but Jim Bolger was more than satisfied as she was far from being fully wound up. fully wound up.

To sum up, what looks an intriguing event, I go for Maximova to win for the Head family whose connection with Irish racing spans

Mysterieuse Etoile is the pick on form

The Prix Saint-Alary at Long-champ tomorrow is extremely difficult to sum up with all eight fillies having chances so I am going to stick with the form book and select Mysterieuse Etolle to defeat Escaline, Mysterieus Etolle to Guster Higgott's Saint-Alary Mount, Lirde Meadow, dead-heated for fourth place.

Escaline was narrowly beaten in the Prix Penelope by Smuggly who had had the advantage of a previous outing. Smuggly is very much fancied for the Saint-Alary and has not rin since while Escaline took the group III Prix Vantesux from Soigneuse and Little Meadow in spite of being in season. Seigneuse is reported to have made great progress in the meantime but I prefer Brillante for third place. Still only a novice compand to some of her rivals. Brillante looked an Miss Mulaz in the Prix de la Seine. The Aga Khan's Sharaya is another with enormous potential. She has won both her races including the Prix de Bagatelle, including the Prix de Begatelle, which Sharaya took by four lengths. This leaves the Berry Hills-mained Nibabu who will be ridden by Steve Cauthen. After a promising effort when second to Goodbye Shelly in the Gainsborough stud Fred Darling Stakes and New Coins in the Musidora Stakes at York. Apparently, Nibabu ran too freely on the heavy ground that day so the

Canthen will so on to partner Top Creator for Hills in the two and a half mile Prix du Cadran but I fear the pair will have to be content with second place behind Denel. He won the Prix de Barbeville before being given a poor ride by Yves Saint-Martin in the Prix Jean Prat when the colt was given and property the oolt was given an enormous task in the straight. Dend was finally norrowly beaten by Kelbomec and Karkour, who will also be in the Cadran line-up.

and Harrods tell me that children are becoming increasingly demanding about the clothes they choose to wear. Gone are the days (did they ever exist?) when they wore what you told them to or thought suited them. In their wake has come a generation of little girls who want to look "just like mummy" (Marks & Spencer) or "like their big sister" (Harrods) and of boys who "if they are fashion conscious - and more and more substitutes" (Harrods).

None of which actually is new: if mummy is half-way pretty, daughter has always tried to emulate her (witness those dreadful bikinis worn by little girls years before they have anything to cover). In recent years botanical draw-ings have become increasingly popular with collectors, who like the combination of scientific interest and decorative impact. But it is only now that a. dealer has thought to mount an exhibition which chronicles the growth of the scientific approach to botanical study. "The Discovery of Nature", as the felicitously called, opens on Wednesday at Eyre &

venue, as Eyre & Hobhouse are known for their interest in the work which Indian artists did the most stunning botanical drawings now known to us were early nineteenth century by Indian draughtsmen working for British patrons. A few of these drawings are to be found fall into this category.

Skilful as these Oriental artists were, it is perhaps necessary to emphasize that the scientific depiction of plants is in fact a wholly European invention. There is no precedent for it in either the Indian or the Chinese tradition, even though so-called "bird and flower" paintings play quite an important part in the history of the Chinese school, from Sung times onward.

flowers began to be made long before the whole matter of botanical classification was settled. In seventeenth-century for British patrons, and some of Holland an important source of patronage was provided by bulb dealers and nursery men, who done in the late eighteenth and wanted to advertise their wares - chiefly tulips and carnations. The show at Eyre & Hobhouse contains a group of unfinished In Europe accurate represen-tations of specimen plants and one inscribed "This specimen I received of Sir Hans Sloane,

He eventually became the official painter to the Musée d'Histoire Naturelle in Paris. These four drawings, all of them ravishingly decorative, have an extremely grand provenance France to the Duchesse de

collection of her sister, the Empress of Brazil. The most spectacular items

in the show, however, are undoubtedly the superb sheets by early nineteenth-century artists. Part of their attraction is that they depict exotic species the Coral Tree, the Musk Mellon, the Tree Peony - but even the style seems to strike a subtly exotic note. Somehow the way in which the specimen is arranged on the page, the thythm of leaves and stems and flowers and fruit, make one immediately certain, even without consulting the catalogue, that these cannot be by a European hand. One can find in this fact (I certainly do) a kind of backhanded proof that the best botanical drawings do continue to be art - the aesthetic impulse is never

completely subordinated. Fine botanical drawings are now rising rapidly in price. At Eyre & Hobhouse prices begin at about £350 and rise to about

There seems to be a recurrent feature in the lives of young chess prodigies, that of learning how to play through watching a relative, often father or an uncle, play the game. The four-year-old Capablan-

ca learnt chess through watching his father play a friend, and the story is echoed by that relating to the Russian chess genius Garry Kasparov, who picked up chess just by watching his parents at the board. The story came to light in an

inteview with Kasparov by the Russian master Vatnikov in the April issue of Schach, an East German magazine that specializes in Russian chess, Apparently. Garry was all set to go to music school, but once his startling skill was revealed - he was able to supply the solution to a chess problem that had tormented his parents for hours - he was sent to a chess club instead. Kasparov regards this as his first chess success. His further progress is legendary.

Asked by Vatnikov what he had wished to achieve in the Interzonal tournament at Moscow he replied, "My aim in every tournament has always and final game of the match. Jeremy Flint chess".

"Is it of any particular importance?": Vatnikov went on, "that you already have to meet grandmaster Alexander Belyavsky in the quarter-finals of the Candidates? "Of course, from the point of view of preparation! Belyavsky is a very strong opponent, but even before the draw I thought it was much the same, whomever I met first."

Asked whom he thought he would meet if he beat Belyavsky, Kasparov replied that it depended on the result of the match between Portisch and Korchnoi and in that match he was reckoning on a win for the Hungarian grandmaster. If, however, Korchnoi were

The board of the United Kingdom company, which has a turnover of £609m a year, said that as a result of a £390m refinacing package agreed for the Massey organization, the British group should return to profit during the year.

This follows yesterday's announcement of pretax losses of £35.4m in the: 15 months to January 31. The figures include extraordinary costs associated with the reorganization of the business including the redun-dancies which followed the closure of the Massey factory at Knowsley in Cheshire.

The results were also affected by poor trading conditions despite an end to the four-year decline in United Kingdor tractor sales. Massey's UK tractor sales were up by 33 per cent compared with 1981 which restored the company's position as market leader, while sales o industrial tractors increased by 14 per cent. But the company reported that there was still no indication of any improvement in the combine harvester

market. Last December, Massey announced details of plans to invest £11m over the next three years at the Banner Lane tractor factory in Coventry. The investment follows extensive redundancies at the factory where the number of employees has fallen by 2,000 to 4,500 since 1980.

Which way will interest rates go after the election? If you have no idea, an investment in Cater Allen's financial futures fund could give you a hedge against unexpected interest rate changes. That is the function of financial

The fund, which is based in Jersey, was launched six weeks ago, and is the only one of its kind. Half the money goes into conventional gilts and the other half into the financial futures market.

Cater Allen Investment Management which runs the fund, is the new name for the old Allen Harvey and Ross team, headed by Mr Michael Lawrence, who has done well with its Jersey based gift

There is an initial charge of 5 per cent but if you deal direct with the fund managers you should try asking for a discount. Most of the 5 per cent charge would normally go to pay the intermedi-ary and Cater Allen might well consider offering a discount to a private investor. The minimum investment is a bit high

Co-op account sting

Mr Terry Thomas, General Manager of Co-op Bank, has taken another step towards offering customers what they want with a new interest-bearing current account paying 10 per cent if they keep more than £1,000 in credit. No rest is paid on balances below

Most customers will still be better off keeping say £300 in an ordinary Co-op Bank account - on which there are no charges so long as the account is in credit (but no interst paid) - putting the £700 balance into a building society extra-interest account earning 7.25 per cent, net of tax. This would give tree banking and an income net of basic rate tax of 250,75, compared with an after-tax income on the new Co-op account of £49 (or less if the balance dropped below 21,000).

Charges criticized

Currency fund managers who take a 5 per cent initial charge are just "ripping off" their investors, according to Howard Flight, who manages Guinness Mahon's international Fund – a managed currecity fund based in Guernsey.

He believes 5 per cent is excessive. Guinness Mahon charges 2.5 per cent initial charge with 0.5 per cent annual management fee.

The international Fund has been the top performer of the six managed currency funds over the past one and two years. It has shown a return of 29.8 per cent over the past 12 months and a total return of 91,4 per cent since taunch

The old insurance joke about the policy covering you for that "everything" was covered.

The policy covering you for that "everything" was covered.

Miss Potts's mother was so did, details of cover and incensed at Norwich Union's refusal to pay that she wrote to the case of Miss Rosalind Potts, a student at Magdalen College, Oxford.

Just before Easter she went Insurance Association confirms that the standard package travel policy sold by most of its member insurance associated to make an "ex gratia"

On a five-year view all of them have outperformed most of the other general trusts, and

In Paris she had all her Norwich Union. To her surprise, her claim was refused on the grounds that

the policy did not cover money - only personal effects. "But there is nothing in the policy exclusions to say that money is not covered", she pointed out.

Indeed, the assistant at Oxford Student Travel stems to have suffered the same miscon-

agreed to make an "ex gratia" payment of £50.

Norwich Union concedes that money is not specifically policy, put together by Accident and General Insurance Brokers, is not a standard Norwich Union policy, but one devised by the brokers which Norwich Union agreed to underwrite.
But Miss Potts's experience
highlights a number of import-

many thousands of these poli-cies have been sold to unsuspecting students who believe that they are covered for loss of money? Mr Courteney Heath,

Accident and General, has no sales figures but confirms that "probably half a dozen" university student unions sell the Second, consumers were

companies includes cover for money. "It is very rare for a policy to make no mention of money at all," says an official. The student travel specialist, Endsleigh Insurance, says that its standard student package does not cover loss of money. but this fact is stated quite clearly in the list of exclusions.

What is Accident and General's reaction to this? "Money and travellers cheques are always quoted separately from personal effects," says Mr Heath. Would it not be useful then to point out that this particular policy did not cover money? "No I don't think it would be

useful. If you go to those lengths there would be no end to the list of exclusions," is the unhelpful response from Mr Heath. Norwich Union takes a much

more realistic view, is con-cerned, that holidaymakers should not be misled and says that it will be looking into the wording of this particular

A third issue is whether holiday insurance be sold by unqualified personnel in travel agents. We checked out Miss Potts's claim that she had been

"What does it cover?" "Everything," came the instant reply. "What about money?" "Oh well, it doesn't cover that but no policy covers money.'
Incorrect information again.

It is clearly better that holidaymakers have insurance cover of some sort rather than no cover at all. But if a travel policy is to be

sold by non-specialist sales-people, through ordinary retail outlets, then the terms and conditions should be capable of being understood by even the most financially naive cus-tomer. It is not good enough for the Insurance Ombudsman to criticize holidaymakers for not reading their policies, if the policies themselves are vague, unclear and fail to make any mention of such obvious items

Finally, any student who bought one of these policies and has had a claim for lost money turned down should get in touch with Norwich Union

FINANCIAL ADVICE

A Message from the Chairman

"This month marks the 25th Anniversary of the Towny Law Group. We have every reason to be proud of our achievement in becoming the leading personal financial planning advisers in the United Kingdom. We wish to thank our clients, both individual and corporate, for their continuing and leyal support in an era which has seen an unprecedented growth in the: dety of insurance and investment opportunities available.

Our specialist services include such diverse subjects as cutting the cost of private education, advising on the most sultable mortgage repayment plans, providing tax efficient pensions, arranging life assurance policies, saving Capital Transfer Tax, and selecting the "best buys" in unit trusts.

We have extended our general insurance services to risk management, have become established Lloyd's brokers and manage the underwriting interests of members of Lloyd's.

The last ten years have seen the introduction of statutory safeguards for investors, with more still to come. We welcome every safeguard for the investing public, and believe that those who need financial advice should have every possible protection. It is for this reason that we fully support the insurance Brokers (Registration) Act as a means of upholding professional standards backed by statutory sanctions.

Whenever you need advice, you should always seek the best. On this, our 25th Anniversary, we would like to think that you will join our 50,000 clients in asking for our insurance and financial advice for the next 25 years."

We would like to thank the lasorance and Unit Trust Industries for their support and in particular the following:-

The South African mines, particularly, are suffering from costs still rising by about 15 per cent annually and, ironically, the strengthening of the rand against the dollar. Their results in the June quarter will reflect these influences. At the same time yields have

fallen remarkably. The resolution to the conundrum lies - as always with gold - in the primitive psy-chology of the market. If there are sufficient fears about the future, justified or not, the gold

strategy is to stay with high quality mines such as Driefon-tien, Kloof, Vaal Reefes and Western Deep Levels - and watch the gold price with eagle

Gilts

The most notable thing to say about the gilt-edged market this week is that it has done virtually nothing. Few of the major investors are prepared to take a view of developments on this side of the Atlantic with still more than two and a half weeks to go to the election, and there is considerable uncertainty as to which way the US interest rates are likely to go.

The latter is probably the most important factor. The Republican-controlled Senate has thrown out - albeit by just one vote - the latest Reagan tax cut proposals on the grounds that they might fuel inflation. This is familiar ground: monetarists versus pump-primers -but with the checks and balances which exist in the US political and financial system it is difficult to predict just what

will happen next. The London equity market ers' record of £664m has been much more fun. The still resisting strongly.

word fun is used advisedly, since although the market has recovered its nerve to the tune of a 20-point-plus improvement on the week, this has been achieved on a low volume. When the considered by shareholders on June 30, many of those sympathetic to the board could have sold their shares on the strong market, thus whittling away the very narrow margin by which the board won its last

battle with Lonrito. Capel Cure Myers, the broker to Lourho, last night denied market rumours that it was behind yesterday's buying. "We

away from the pack and leap-frogged over Jacklin with a 68 and a total of 133, thanks principally to an

improbable three at the long 16th. He drove into the left rough, struck

a three wood into the right rough and holed a pitch shot from 64 vards. A pushed eight iron on the short 17th threatened his lead but he made amends with a sand iron to 18 inches at the last.

Jacklin establishes

a grumpy mood

for his celebration

By John Hennessy, Golf Correspondent

Tony Jackin broke a huge log Cup captain. We can expect the fur jam on the second day on the Car to fly, if disappointingly only behind the closed door of the committee day. A 12 foot put rolled obediently nome on the 18th for a score of 69, one under par, and a two round total of 134. He thus nosed ahead of the course, Clark broke away from the pack and leap-

It ought, you might think, be a moment for general jubilation and mellow recognition of the difficulties involved in preparing golf course this year, but Jacklin used the occasion, instead, for an attack on several fronts. Why, he asked play the first tow tournemants in the north? Why, in any case, play them in different courses? And why not prepare them more conscientiously? Wimslow last week had taken him back 20 years. The Sand Moor Greens this week were like a Yorkshire pudding that had not set, "They are really frightening".

Nick Faldo, earlier in the day, But he turned on the might rough and holed a pitch shot, from 6th and holed a pitch shot, from 6th eight rough and holed a pitch shot. If the treatment his lead but he made amends with a sand iron to 18 inches at the last.

Clark was playing with Severiano Ballesteros, who had a characteristically adventurous round. He began with three birdies in the first holes, and was then unhinged by three puts from five feet at the fifth. Two more fives immediately invaded his early followed by a sixth at the minth, where he went out of bounds.

FOOTBALL: THE AMERICANS GO HOME WITH A HEAVY HEART: MELIA COMES TO TOWN WITH A LIGHT ONE

Mexico wins the World Cup

Stockholm

The decision of FIFA openly to insult one of the most powerful nations among their membership, the United States, may in the long term prove to be in the best interests of the world's most important game. For too long international football has been ensnared by political motives and personal interes

with the ball having been hooked back rather clumsily in the American half of the field, the contest in poised to become intriguing as the New World challenges the apparent lack of democracy in the old world body's vertilet.

By an allegedly unanimous decision the FIFA executive committee have awarded the 1986 World Cup finals to Mexico, following a process of argument which, if it were adopted by a town council's housing committee, would almost certainly end up in the courts. Yet FIFA's autocratic body are beyond independent judgment or

FIFA yesterday allowed a US Soccer Federation delegation includ-ing Henry Kissinger, to travel here from America to make a bid for the 1986 finals which was subsequently seen to have been doomed weeks, if not months, beforehand. The ridicule and insults to which Canada were equally subjected may prove to have

been imwise, not to say unintelligent.

To have utterly rejected the 50minute plea by Dr Kissinger, Pele and the US soccer vice-president, Werner-Fricker - to be granted not the finals but at least an inspection of facilities has deeply angered several Americans on the sidelines of the charade which took place yesterday who, at the touch

this magnitude behind closed doors, without making an equal assessment of all bids. They have got away with it for too long. Now they've got it coming to them".

Both Dr Kissinger and the Canadians, led by Jim Fleming, formally wished Mexico well but the Canadians in th dians issued a statement saying: "We regret the failure of FIFA to send its

Each delegation were allocated 30 minutes. Canada, after 25, were abruptly warned by Havelange: "You have five minutes". Mexico followed. Four of their six members were from television. They were out in under eight minutes or, as a Canadian observed, just about the time required to shake hands with the 20 members

In went the entourage led by Kissinger, who had arrived by private plane at 5 am. Havelange, prolonging the insult, allowed the United States delegation to remain for almost an hour, during which Dr Kissinger said that the American case rested on its merits, not on criticism of Mexico; that there more young soccer players than baseball playerrs in the United States; and that where there were two

child of soccer. I honestly believe that the game urgently needs something new, a fresh face, because everywhere the game is under pressure from other interests, from tennis, basketball and so on. There is nothing new for the game in Mexico or Italy. If Brazil, my own country, was a candidate, I would still say give it to the United States because it is there that the game can expand and gain fresh impetus."

But someone in the meeting said that the committee looked at the greatest player the game has ever seen with bland, unfeeling eyes, as if he were no more then a commodity, like zinc or barley. Many of us have long known that FIFA have scant regard for footballers, otherwise how could they allow such abysmal refereeing, such craven subservience to the demands of television?

While the US delegation were in the conference room the Mexicans outside were already busy discussing the first-round grouping of matches for 1986. Their president, Rafael Del Castillo Ruiz, having been seen armin-arm with Guillermo Canedo, the Mexican member of the executive, confidently stated: "We only needed one minute. Our offer was the best, The only one to satisfy FIFA demands." Long before FIRA's official statement tequila cocktails were being prepared in the hotel lobby for public celebration.

Harry Cavan, the FIFA vicepresident, having stated publicly beforehand that he believed the subcommittee were wrong not to have visited all applicants, was embarrassed by the "unanimous" an-nouncement that showed where his vote had gone, though he claimed he had insisted on the losers being informed of the vote before the announcement. "Nice of you to let us know you'd shot us, Harry", Canada's Minister of Sport R. J Perrault, said.

Kissinger: roled offside

Hermann Neuberger, chairman of the World Cup organizing committee, who hopes to succeed Havelange, not only claimed that secret voting was not undemocratic but made great play of the alleged failure of the US to meet the March 11 arbitrary deadline with their presidential and financial guarantees. But as Phil Woosnam, of the North American Soccer League, said: "If that was the point on which we failed then there was never any point in our being here."

Canada and America each pro-duced elaborate, documented brochures of 90-odd pages. It was learnt yesterday that Mexico's bid for the most valuable sporting event on earth consisted of six foolscap sheets. That suggests to most people that the World Cup was never really put out to tender. Dr Kissinger diplomatically insists: "We will not engage in any criticism of FIFA's action" but from the way his aides are talking I do not think FIFA have heard the end of this

They still seemed unsure whether they were awake, or in a morphean twilight. This is not a criticism of the batsmen, just an explanation. So rarely have they had a bat in their hands in real contest this season that they could be forgiven for thinking it was all a dream.

It must be said for Glamorgan, however, that they had woken to the alarm clock, sounded by their new captain, Selvey. He and Nash made the ball swing, under the heavy skies, and Surrey, after winning the toss, batted languidly.

The new-look circuit takes in only part of the original course, two legs of which are now joined by an of which are now joined by an indulating and twisting section of challenging curves. These have been designed with great imagination to retain the traditional appeal of Spa as a real test of driver ability but without the unacceptable dangers of the old course, which cassed the Grand Pair to more alexabler.

The almost unanimous view of the top drivers is that it is exciting and testing to be racing again on a track which demands much of man and machine. Apart from one place, where there is little protection should a car leave the track on the outside of a very fact downhill outside of a very fast downhill double left-hand bend, there have been no serious criticisms. For once the weather has been king throughout practice and in dry conditions this is certainly a turbo circuit. Should tomorrow's race be wet, the dispartiy of lap speeds seen yesterday will shrink dramatically and a member of the Williams team has been so bold as to suggest that if it is really wet they (the turbocharged runners) will have a rude awakening. "Keke will purverize them on this track", he said, referring to Rosberg's almost uncanny car control when conditions are really difficult, a quality which is reminiscent of that of the late Jochen Rindt and Ronnie Peterson.

Another convert to turbo power has been confirmed with the announcement that the Ligier team will use Renault engines next year. But there is more than a ray of hope on the porizon for the users of non-turbo three-litre engines. Apart from the fact that no refuelling will be allowed next year, the maximum fuel allowance will be reduced from 250 to 220 litres, with a further reduction to 195 litres in 1985. This suggests that the tubos will have to-be detuned to around 550bhp, by which time the three litre en

is exactly what Don Rutherford is trying to do in International Rugby for Players, Coaches and Speciators (Heimemann, £5.95).

Mr Rutherford, a former England and Lions full back, now the Rugby Football Union's technical administrator, is a 'modern' in what many people consider an organization people consider an organization and the second rugby, such as those who gathered in Cardiff for the Weish centenary in 1980-81, but he was a layers of people consider an organization bossed down by tradition. Yet he is sufficiently at home with the history of the game to quote John Daniell, an England selector from 1913 to 1939 and nicknamed 'The Prophet', on the principles of selection which still hold good. Since selection has been such a bone of contention this season it is worth an aide memoir on the basic truths of the job.

It is also significant that his book begins with the impact of television on the game. There can be no doubt of the game to the selection of the game to quote for the world of the game to the wish would do well to read his thoughts on what they are likely to find there.

Surely that is no legacy for an amateur game. Brown adds: "When players have a dilemma over whether to play because of injury the decision should be taken out of the decision should be taken out or their hands as quickly as possible. Most of the time the major problem is getting the players to talk about is getting the players to was appur injuries they are carrying. few players are capable of making a completely fair and unbiased decision when it comes to weighing up whether they should play or not. The reduction of inflation to four per cent is a "resonnding success for the policies and commitment of Mrs Thatcher", says the Daily Express "Even Mr Michael Foot must find that the pound in his pensioner's pocket goes reassuringly further."

The Daily Mail finds it "surpassing strange" that Mr Francis Pym should state that he does not believe there will be a Tory landslide, and

should state that he does not believe there will be a Tory landslide, and that such a landslide would not be a good thing anyway. If that is the way he is thinking, perhaps he should leave the Cabiner and agree to become Speaker in the next Flouse of Commons, the paper adds.

The Daily Mirror leader also concentrated on Mr. Pum's remarks. concentrated on Mr Pym's remarks.
"If Mrs Thatcher wins the election
then one thing is certain: Pym's No.
I for the chop!"
